Subject: Webinar on Online Permitting Enhancements for Residential Solar Photovoltaic

The Development Services Department (DSD) will host a webinar on Wednesday, Aug. 2 at 11 a.m. to help customers apply for residential solar photovoltaic permits and battery storage projects.

The webinar will explain planned upgrades to online permitting per Senate Bill 379 and include a live demonstration on applying for a permit. These upgrades will make applying for a solar PV permit and battery-storage projects up to 38.4 kw for single-dwelling units and duplexes faster and easier.

Starting Aug. 7, customers will be able to submit new residential solar photovoltaic (PV) and battery storage applications, upload plans and specifications and receive a permit in real time through DSD's online permitting portal.

The interactive Zoom webinar will be facilitated by senior DSD staff and recorded for viewing online 24/7.

Wednesday, Aug. 2 (11 a.m. to noon)

#DigitalDSD

The new online features for Building and Land Use enforcement and construction noise applications are among the latest enhancements to the City's permitting process to help reduce permitting processing times and provide enhanced service to customers. It is an

integral part of #DigitalDSD, an initiative to modernize all DSD workplace systems and cost-effectively leverage technology to increase productivity and improve service delivery.

What are the current processing times?

You can now check on [permit processing timelines](#) for intake and issuing a permit.
